Penalties in bold are early arrival

There was no penalty for not visiting a DSO (as all DSO's had a codeboard, hence you got a missed board anyway)

All codeboards have been collected, so they were up for the entire event

Boards which caused problems were in the following locations

H6 – 422 527.5 (depart the first spot height SSE)

WV – 410 501 (Approach 149 from NNW)

G7 – Upper Derndale Farm (herringbone)

39 – 485 469 (herringbone)

LD – 464 456 (herringbone)

N7 – North of Bell at Tillington (herringbone)

57 – Burghill Golf Course (herringbone)

M2 – Bunhill Fm – GYY YYY YGGY – you needed to leave the A438 and approach Bridge Sollars from North

58 – Ailey village - Navigation says only pass 1 pub, you've been passed Swan Letton, Can't pass Kinnerseely too.

E3 – “The stocks” loop – Depart spot height 125 WNW

XN – on the Long Way Round at 5 way junction into Dilwyn Village from A44 (navigation says LWR at last junction)

RV – Dilwyn Underpass – The grid references & compass points plot it

MU – Bagley Head – again the grid references plot it

Huge thanks to the marshals

Charlie for driving route 3 times, and spending 2 hours checking the navigation

Steve Farrington for collecting the codeboards when everyone else was already back home!

My control marshals Nigel Smith, Steve & Caz Wilkes, Foxy, Graham Powell, Sue and Sooty (couldn't resist that)

& Chris for hosting it, making the codeboards and filing most of the paperwork
